COVID 19
CORONAVIRUS DISEASE

FREE AT-HOME COVID-19 TESTING

Harris County Public Health has free at-home COVID-19 testing for county residents living outside of Houston city limits.

If you or someone you know cannot visit a testing site because of disability status, lack of transportation, or other valid reasons, we can provide free COVID-19 testing at home.

A nurse travels to the home to perform the COVID-19 nasal swab test at the front door. The person must meet the nurse at the front door (nurses and staff cannot enter your home).

Test results are available via email within 1-2 days.

To make an appointment:
